

MIREL Software Questionnaire

This questionnaire is sent along with order confirmation for:

- Issuing a new license - if the requesting worksite does not have any other MIREL software
- Supplementing a new license - if the requesting worksite already has MIREL software and wants to expand a license to include other modules

All questions must be answered in order to successfully register or change a prior registration. Late or incomplete sending of the questionnaire has an impact on the delivery date of software MIREL.

1 License number		2 Worksite name

Completed by	In	Dated

Explanatory notes

No.	Field contents
1	Completed by manufacturer for a new license. Only completed by the applicant if the request is to supplement an existing license.
2	Enter the name of the worksite that will use the software (e.g. company name, with classification number if needed).
3	Enter the name of the contact person who will use the software.
4	Enter the phone number for the contact person.
5	Enter the email address for the contact person.
6	Enter the required modification of MIREL MAP according to the document 2296MAP – Catalogue list.
7	<p>Fill only in case of MIREL Transwin requirement. Choose the requested scope of permissions. If the software operator is not also operator of a locomotive, such scope of permissions is conditioned by written consent from the locomotive owner.</p> <p>Permissions options for MIREL Transwin:</p> <p>Read new data only - only the most recent read data can be read by MIREL Transwin</p> <p>Read all data - all data stored on the registration equipment can be read by MIREL Transwin</p> <p>Unlock archive - MIREL Transwin allows to rewrite already read data. It is recommended to set for each locomotive on single worksite only.</p> <p>Time set up – MIREL Transwin allows setting up the time in MIREL registration equipment based on the PC's system time at each data read and sets up the transition dates for summer/winter time.</p> <p>This permission is recommended.</p>
8	Fill only in case of MIREL KAM requirement.
9	Fill only in case of MIREL TEST3G requirement
10	Fill only in case of MIREL TSM3G requirement
11	Fill only in case of MIREL Transwin requirement. Enter the exact numbers and operators of a locomotive, from which data can be read after written consent from the operator of a locomotive.
