

The identification unit of the integrated on-board system MIREL RM2

Type **RM2ID**

illustration picture

RM2ID is the periphery of the integrated on-board system MIREL RM2. For communication between RM2ID and basic unit is used serial bus RS485.

RM2ID device allows an operator to enter the identification information, operating parameters and allow the choice of modes of the integrated on-board system. Furthermore, it allows to monitor data provided by the central unit of integrated on-board system.

As user interface is used numeric keypad and two-line vacuum fluorescent display.

Fixing components are delivered with a product.

Modifications:

Designation	Dimensions [mm] W x H x T	Weight [kg]	Nominal supply voltage [VDC]	Software accessories	Number of buttons
RM2ID.1.201A	150x100x64	0,4	24	01	12
RM2ID.1.401A	150x100x64	0,4	48	01	12

Specification:

Number	Version	Name
1976RM2	150612	Technical conditions
199M	160919	Box 144x72 Built-in conditions
